A COMMUNITY OF CHOICE

TO: Mayor Kaysen, City Council  
FROM: Matt Ashby, Planning Service Director  
SUBJECT: Updates to Development Review Fee Schedule  
DATE: May 5, 2014

Following discussion at the April 28, 2014 City Council meeting, the following items are presented for consideration by the Finance Committee:

- 1.) Clarifications noted by Mr. Emmons at Council Meeting of April 28, 2014 have been reflected in the attached document.
  - a. Development Agreement (boilerplate pages excluded), Financial Surety (Clarified), Site Plan levels have more description, Subdivision Waiver clarifies several may be requested under one request, and Residential Annexation pocket is defined.
  - b. The costs for Preliminary and Final Plat have been reversed to allow the preliminary plat to be the lower cost, since there is a chance the project might not be approved, or the developer may not choose to proceed with the development. The higher cost comes with the final plat, when a developer has more certainty that a project is viable.
- 2.) The concept of moderating costs for small developments could be addressed by using a flat rate plus a per lot cost for platting activities. If the Governing Body would like to consider this approach, an alternative fee schedule that could be substituted for Preliminary, Expedited, and Final Plat is listed below:

|                               |                  |
|-------------------------------|------------------|
| Plat – Final:                 | \$250 + \$15/Lot |
| Plat – Preliminary Expedited: | \$600 + \$15/Lot |
| Plat – Preliminary:           | \$350 + \$15/Lot |

In comparing the original "Flat Rate" proposal to the revised "Flat + Per Lot" proposal, the revised approach successfully reduces the total cost for small developments. However, it tends to increase the cost of a larger development. If the Governing Body wishes to address the scale on the top end, one approach might be to establish a maximum fee.

| 10 Lot Subdivision  | Flat Rate | Flat + Per Lot |
|---------------------|-----------|----------------|
| Preliminary         | \$947     | \$500          |
| Final               | \$641     | \$400          |
| Total               | \$1588    | \$900          |
| 100 Lot Subdivision | Flat Rate | Flat + Per Lot |
| Preliminary         | \$947     | \$1850         |
| Final               | \$641     | \$1750         |
| Total               | \$1588    | \$3600         |

- 3.) Discussion regarding the percentage increase of the fees has been reviewed, and questions have been raised regarding a stepped implementation of any fee increase. Should the Governing Body wish to address this issue, the resolution could be modified to include the following: "Be It Further Resolved that the schedule of fees, charges, and expenses attached to this Resolution shall become effective on July 1, 2014 and phased-in over the next x-months/x-years in equal steps." The Governing Body would need to determine what time period is appropriate to phase in any desired increase. Phasing possibilities could be 1/3 of proposed on 7/1/14, increasing to 2/3 of proposed 7/1/15, with total proposed implemented 7/1/16.
